Positive Patient Identification for Blood Transfusions
Bar Code Blood Bands and ID Solutions

Blood Recipient ID Wristband Systems for Safe Blood Transfusions

Your hospital has invested time and resources to perfect its blood transfusion protocols to deliver superior patient care. Yet just one patient or blood misidentification error can have a serious or even fatal result. According to the FDA, there is an average of 414 transfusion errors in the U.S. each year. That’s why one of the top National Patient Safety Goals established by the Joint Commission is to eliminate transfusion errors related to patient identification.

Using Securline® Bar Code Blood Bands satisfies The Joint Commission’s requirements for a one-person verification process. Bar code technology helps prevent misidentification caused by human error and provides greater workflow efficiency to allow caregivers more time for patient care.

With serialized bar code ID and alpha-numeric codes, Securline® Bar Code Blood Bands accurately match the right patient to the right blood, ensuring maximum safety throughout the blood transfusion process. They provide unrivaled scanability, safety, and security!
The Joint Commission’s National Patient Safety Goal for Blood Transfusions

NPSG.01.03.01
Eliminate transfusion errors related to patient misidentification

Before initiating a blood or blood component transfusion:

- Match the blood or blood component to the order.
- Match the patient to the blood or blood component.
- Use a two-person verification process or a one-person verification process accompanied by automated identification technology, such as bar coding.
Streamline the Blood Transfusion Process and Improve Patient Safety by Reducing Human Errors

- Instantly captures and verifies data electronically for transfusion verification, specimen collection, and patient charging
- Saves time and money by streamlining the patient ID and blood transfusion workflow
- Works with your existing blood bank system, so there’s no IT involvement or capital investment
- Helps prevent life-threatening and costly misidentification errors
- Complies with the guidelines of HIPAA to protect patient privacy and AHA to minimize the chance of lost or transferred data.

Partner with the Identification Experts

No one understands the critical role of positive identification better than PDC Healthcare, which has been trusted by the leading hospitals and medical centers for over 55 years. Our patient identification solutions are in use at more hospitals than all our competitors combined.

Customize Your Blood Band!

We can create a custom bar code blood band to meet your unique requirements. Call us at 800.435.4242 to learn more. Typical customizations include: specific serialization, custom information area, custom colors, and specific number of labels or bar codes.
Securline® Bar Code Blood Bands

Patented, dual-purpose, hybrid style wristbands let you handwritten information or use with your LIS label for accurate patient identification. Features matching serialized bar codes and alphanumeric codes to link the patient, draw tubes, transfusion requisition, etc., according to your specific hospital protocol.

2431-**-PDB Standard Format Labels

- Larger font (10 pt.)
- Total of 20 matching labels (8 bar code/alphanumeric on wristband; 12 bar code/alphanumeric on draw tube tail)

<table>
<thead>
<tr>
<th>Product Number</th>
<th>Size of Band</th>
<th>Information Area</th>
<th>Max Label Size</th>
<th>Bands Per Box</th>

### Dual-purpose for LIS labels OR handwritten information
- Larger font size
- Fits adults & pediatrics
- Easy to apply

Patented dual-purpose, hybrid style lets you handwriting information or use with your LIS label

Standardize and consolidate to a single blood band, even if you have multiple labs

Downtime solution allows you to hand write information on the band as a back-up method

Designed for inpatient or outpatient use

Laminate shield protects patient information and bar code from water or solvents for accurate bar code scanning

Advanced material resists moisture, alcohol and hand sanitizer to preserve bar code integrity for accurate scanning

V-Notch™ patient ID label ensures proper placement on BD Vacutainer for bar code scanning and visibility of tube color

Meets The Joint Commission’s National Patient Safety Goal for blood transfusions for a one-person verification system!

Identify delicate NICU patients without disturbing or unswaddling to help promote healthy development

Specially designed for NICU patients, the Securline® NICU Blood ID Tag provides positive patient identification of your most fragile, critical patients for blood transfusions, cross/type, etc. It’s the first and only patent-pending blood ID solution for NICU patients. The tag is easily secured to the patient’s primary identification ankle band or wristband using the TenderCare® Infant ID Tether. This allows the patient to be positively identified while remaining comfortably swaddled and secure, to help promote healthy development.

- Soft material is suitable for delicate skin
- Includes matching bar code labels to link the patient, draw tubes, transfusion, requisition, etc. according to your hospital protocol
- Helps prevent human ID errors and reduce unnecessary blood re-draws
- Tag and tether design allows nurse to scan and identify newborn without unswaddling or disturbing the infant

**Securline® NICU Blood ID Tag**

- 4 matching bar code labels on tag tail
- Permanent bar code remains on tag
- Easily attaches to primary ID using TenderCare® Infant ID Tether
- Patient information area for handwritten info or patient ID label
- Substitute ** for numbered color:
  - Yellow
  - Red
  - Green

**TenderCare® Infant ID Tether**

- Simple and convenient method to access ID tag of swaddled newborns
- Ultra-soft and durable material for delicate newborn skin

- **Easy as 1 – 2 – 3**
  - **Print**
    - Easy drop-in replacement works with your existing laser printer and format so there’s little to no change needed.
    - Jam Free™ printing in virtually any laser printer.
  - **Remove**
    - No laminate shield
    - No assembly needed
  - **Apply**
    - Fast and easy application saves nursing and admission staff time to improve workflow efficiency and allow more time for patient care

**Image Quality That Stands The Test Of Time**

Patient identification information is the crucial foundation to patient safety, so shouldn’t it be able to stand the test of time? PDC Healthcare brings you DuraSoft®, a masterpiece in laser patient ID wristbands. With printing that is resilient to fading or smudging and material durable enough to withstand moisture, alcohol and solvents, plus an antimicrobial additive that protects the wristband surface against tested non-pathogenic bacteria,* DuraSoft® will keep other wristbands looking up for inspiration.

**Total Customization Available!**

Customize DuraSoft® to meet your exact needs. Typical customizations include pre-printed logo/text, custom colors, custom hole punches, pre-serialization, specific number/format of labels, etc.

**More Laser Wristband Solutions Available**

Go to www.pdchealthcare.com/durasoft for more information or call us at 800.435.4242

*DuraSoft Wristbands eliminate more than 99% of non-pathogenic bacteria within 24 hours, based on independent laboratory testing.*
Labeling Solutions for Blood Banks

Reduce Errors and Improve Patient Safety with ISBT Compliant Labels

PDC Healthcare can help you meet the ISBT Blood Bank standards with our complete line of blank and pre-printed labels.

Get High Impact Communication with Highly Visible MedVision® Labels

Choose from a variety of preprinted fluorescent labels to communicate important alerts. Customize your own label to meet your specific needs.

Streamline Lab Workflow with LIS Labels Designed for Leading Laboratory Information Systems

No matter the LIS and printers you use, we have the largest selection of compatible labels. Enhancing optimal workflow efficiencies, our robust LIS label line includes a variety of solutions for Sunquest, Cerner, MEDITECH, SoftLab, and others. Plus, our V-Notch Secondary Labels feature a patented design for use with BD Vacutainer® Plus Plastic Tubes for correct and aligned label placement every time.

As experts in labels and media, we’ll help you choose the right products for your unique applications. Call us at 800.435.4242.

Non Bar Code Blood Bands Also Available

If your facility isn't ready for bar coding yet, PDC Healthcare also offers a wide selection of other blood ID wristbands and systems.
